Career Objective

Full Stack MERN Developer skilled in building role-based dashboard systems and data-driven web applications using React, Node.js, Express, MongoDB, and PostgreSQL. Built REST APIs and optimized CRUD operations for large-scale datasets (200k+ records), ensuring smooth frontend-backend integration and performance. Experienced in implementing secure authentication systems and responsive UI development with Tailwind CSS.

Technical Skills

- **Languages & Frontend:** JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3, Tailwind CSS, HeroUI
- **Routing & Forms:** TanStack Router (File-Based Routing), TanStack Form, Zod
- **State & Data Management:** TanStack Query (Data Fetching, Caching, Mutations)
- **Backend & Database:** Node.js, Express.js, tRPC (Type-Safe APIs), MongoDB, PostgreSQL
- **Tools & Concepts:** Git, GitHub, VS Code, Postman, REST API, Authentication, Protected Routes, RBAC, CRUD Operations, Pagination

Projects

Dynamic Data Management Dashboard:

- <https://dc-assin-frontend.vercel.app/>
- Developed a full-stack app using React and TanStack Router for file-based routing. Implemented type-safe form validation with TanStack Form and Zod. Used TanStack Query for efficient data fetching, caching, and auto re-fetching. Performed CRUD operations via TanStack Query's useMutation hook, keeping frontend and backend data in sync.

E-comm:

- <https://ecom-project1-frontend.vercel.app/>
- Developed a full stack e-commerce application with Product CRUD, Cart, Order, and Address management features. Built REST APIs to connect the frontend and backend, integrated the application with a database, and implemented the complete shopping flow from product management to order placement and delivery address management.

200k Products data:

- <https://project-200-frontend.vercel.app/>
- Built a scalable full-stack product management system using React, Vite, Tailwind CSS, Node.js, Express, and PostgreSQL (Neon), managing 200K+ product records with cursor-based pagination, category filtering, RESTful APIs, and database indexing. Optimized query performance using PostgreSQL indexes and implemented responsive UI components for efficient large-scale data browsing and retrieval.

Education

B.Tech – Civil Engineering | Nalanda College of Engineering, Nalanda, Bihar | 2009 – 2013

Additional Information

Self-taught Full Stack Developer — learned modern web development (React, Node.js, TypeScript, and full-stack architecture) through hands-on project building, YouTube tutorials, official documentation, and AI-assisted learning tools.

Work Experience

Web Developer — DigiCroz (June 2026 – Present).

- Developing React.js and TypeScript applications using TanStack Router, TanStack Form, and Zod for routing and validation. Building type-safe backend APIs with tRPC and managing server-state with TanStack Query. Implementing sorting, pagination, and CRUD operations with backend integration. Creating reusable UI components using HeroUI and collaborating via Git/GitHub workflows including pull requests and code reviews.
