Career Objective

Full Stack MERN Developer with hands-on experience building e-commerce applications and role-based dashboard systems using React, Node.js, Express, and MongoDB. Skilled in authentication, REST APIs, and responsive UI development using Tailwind CSS. Currently seeking opportunities to contribute to real-world scalable web applications.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6), React.js, Tailwind CSS, Typescript

Backend: Node.js, Express.js

Database: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Postman

Concepts: REST API, Authentication, Protected Routes, Role-Based Access Control

Projects

E-comm: <https://ecom-project1-frontend.vercel.app/>

- Built a full-stack MERN e-commerce application with **JWT** authentication and role-based access. Implemented **REST APIs** for product management, **cart**, order processing, and address management. Developed a responsive UI using React.js and Tailwind CSS with complete frontend-backend integration.

Multi-Role-Dashboard: <https://dc-react-assignment-frontend.vercel.app/>

- Developed a secure multi-role dashboard using **TypeScript**, **TanStack Query**, **HeroUI**, **Node.js**, and **Express.js**, implementing **JWT authentication**, **Role-Based Access Control (RBAC)**, protected routes, and role-based API authorization through Express middleware. Optimized data fetching, caching, and server-state management with **TanStack Query**, while building responsive, accessible, and reusable user interface components using **HeroUI** to enhance performance and user experience.
